Bark "Tropic Bird"

Book for
Invoices and
Captain's Accounts.

Voyage commencing
6th month 1865.

New Bedford Mass. 10th 1865.

Lemuel D Adams.

Master St. Tropic Bird.

As soon as you are well clear of the land, put the Bark at once under easy sail— See that everything is secure on deck and under deck, and provide for the safety of your boats, bearing in mind that your crew, will not be yet accustomed to the ship, and although the summer season, you may possibly be overtaken by a storm or severe squalls, while in and about the Gulf Stream, and make it a point never to have a piece of sail on except when working for whales that are in sight— four or five miles an hour is fast enough when cruising.

Of latter time I have required the ships to go out and work off on the parallel of 40° say 39° to 41° and had thought of having you go off on that parallel as I think you would be less subject to squally weather than further south, — but in looking over information that I have been accumulating for twenty years, and strongly desiring to place you as soon as possible on good whaling ground, I have concluded to require you to proceed and cruise as I shall now direct, to wit— under easy sail prepare promptly for whaling and steer for a point in lat. $39^{\circ} 30' N$ long. $69^{\circ} 30' W$ where, if the weather is favorable, stay long enough to pass over

that point as nearly as possible two or three times. Two or three hundred barrels sperm oil caught there would serve us just as well as caught further eastward. But after a day or two there, if you find no inducement to stay longer - then run directly south across the stream to lat. $34^{\circ}N$ long. $69^{\circ}30'W$. where take a good sharp lookout, and be assured that on that point and from that point on the line I shall direct, you will be all the way on as good whaling grounds as can be found anywhere. And should you strike whales anywhere on the route, feel quite at liberty to stop anywhere that you find the whales.

From lat. $34^{\circ}N$ long. $69^{\circ}30'W$. work off eastward, looking carefully over the ground, and touch long. $65^{\circ}W$. in lat. $36^{\circ}50'N$ which point I think you will not reach and pass without seeing whales if you have a good lookout.

From long. $65^{\circ}W$. work off gradually and touch long. $52^{\circ}30'W$. in lat. $36^{\circ}N$. and from there to lat. $34^{\circ}30'N$ long. $44^{\circ}W$. - where the "Rascals" saw them last year when coming in, four times. and took two whales that made 100 blb. - they saw them say

8mo. 10	in	$34^{\circ}30'N$	$43^{\circ}30'W$
" 12	"	$34^{\circ}35'N$	$44^{\circ}-$
" 14	"	$34^{\circ}30'$	$44^{\circ}-$
" 18	"	$34^{\circ}05'$	$44^{\circ}20'$

In passing over the route I have laid down thus far, I would not have you run off faster than four or five miles an hour in the day time, and lay hove to at night except where the ground appears quite barren. But looking carefully all the way - if not detained by whales

calculate to be in lat. $34^{\circ}30'N$ long. $44^{\circ}W$. say about 8 mo. 1st. I do not want to direct you to too many localities because I have never known much done by ships that were constantly changing and moving from one locality to another, and if you attend carefully to the foregoing, and when you see whales note carefully the point where they are seen and pass your vessel over that point once or more each day as long as there appears any probability of seeing more there, — you will probably get hold of the whales, so as not to be obliged to go further than lat. $34^{\circ}40'N$ long. $44^{\circ}W$.

But should you be in lat. $34^{\circ}40'N$ long. $44^{\circ}W$ as late as 8 mo. 20th (August 20th) and in doubt about the propriety of staying there the balance of the season — then move directly North to lat. $40^{\circ}N$ and on the parallel of $40^{\circ}N$. say between 39° & $41^{\circ}N$. work westward. I have known so much of whales being seen on the parallel of $40^{\circ}N$. or say between 39° & $41^{\circ}N$. all the way from long. $60^{\circ}W$. off to $45^{\circ}W$. that I should be quite content to take the consequences and have you confine yourselves the balance of the season on the parallel of $40^{\circ}N$. say between long. $52^{\circ}W$ & $45^{\circ}W$, stopping on that line wherever you find the whales.

In drawing up these instructions I do not guess at things — but they are conclusions based upon the careful observation of many years. — I shall therefore expect that they will be carefully noted and acted upon.

I have known more whales seen latter part of the season say in lat. $41^{\circ}40'$ to lat. $45^{\circ}N$ long. $42^{\circ}W$ to $38^{\circ}W$ mostly say in lat. $42^{\circ}20'$ long. $40^{\circ}45'$ than anywhere else. The "Tropic Bird" Capt. Linnick in 1860 saw whales

say 4 mo. 25	lat. $38^{\circ}14'N$	long. $51^{\circ}10'W$	
6 mo. 15	" $43^{\circ}44'$	" $34^{\circ}25'$	14 Days took 250 Bbls.
" 24	" $43^{\circ}52'$	" $34^{\circ}22'$	
" 25	" $43^{\circ}50'$	" $34^{\circ}24'$	
" 28	" $43^{\circ}54'$	" $33^{\circ}30'$	

then: cruising, about same locality, went fifty one days without seeing a whale.

then 8 mo. 18	lat. $42^{\circ}04'N$	long. $39^{\circ}00'W$	16 Days took 250 Bbls.
" 23	" $42^{\circ}15'$	" $38^{\circ}10'$	
" 28	" $42^{\circ}04'$	" $38^{\circ}50'$	
" 30	" $41^{\circ}44'$	" $38^{\circ}40'$	
9 mo. 2	" $42^{\circ}04'$	" $38^{\circ}43'$	
		" $38^{\circ}22'$	

and then on the 14th run for Fayal. They did not get back until 10 mo. 9th when they saw them again lat. $42^{\circ}00'N$ long. $39^{\circ}00'W$

10 mo. 10 Same place.
" 11 Same place.
" 13 lat. $44^{\circ}30'N$ long. $39^{\circ}10'W$.
" 16 " $42^{\circ}04'$ " $40^{\circ}00'$ took 100 Bbls

and run again for Fayal. The "Addison" same year, on the way out, saw Sperm Whales as follows. - 9 mo 2 - lat. $40^{\circ}54'N$ long. $59^{\circ}28'W$.

" 6	" $39^{\circ}09'$	" $48^{\circ}10'$
" 8	" $39^{\circ}00'$	" $48^{\circ}20'$
" 9	" $39^{\circ}32'$	" $46^{\circ}52'$
" 10	" $39^{\circ}49'$	" $45^{\circ}46'$
10 mo. 5	" $41^{\circ}06'$	" $41^{\circ}24'$
" 12	" $41^{\circ}38'$	" $38^{\circ}42'$
" 14	" $41^{\circ}29'$	" $38^{\circ}32'$
" 16	" $41^{\circ}40'$	" $38^{\circ}40'$
" 18	" $41^{\circ}40'$	" $38^{\circ}40'$

Also, bearing upon latter part of season, whales have been seen as follows.

<u>1861. "Roscius"</u>				<u>1862. "Roscius."</u>			
10 mo 21	lat. 39° 56' N	long. 49° 11' W	8 mo 11	lat. 40° 49' N	long. 39° 43' W		
11 mo 3	" 41° 35' N	" 41° 14' W	" 30	" 39° 30' N	" 42° 03' W		
" 12	" 38° 20' N	" 42° 00' W	9 mo 15	" 41° 41' N	" 39° 21' W		
" 16	" 39° 14' N	" 40° 02' W	" 24	" 39° 34' N	" 42° 20' W		
" 14	" 39° 14' N	" 40° 02' W	" 25	" 36° 52' N	" 42° 15' W		
" 20	" 39° 38' N	" 39° 34' W	10 mo 14	" 39° 04' N	" 40° 43' W		
12 mo 3	" 39° 03' N	" 41° 20' W	" 16	" 39° 18' N	" 39° 55' W		
Then went South.				" 19	" 39° 34' N	" 40° 19' W	
<u>1863. "Roscius"</u>				" 22	" 39° 45' N	" 40° 25' W	
9 mo 18	lat. 39° 28' N	long. 33° 25' W	" 31	" 41° 55' N	" 39° 23' W		
" 26	" 41° 49' N	" 40° 22' W	11 mo 4	" 41° 58' N	" 40° 04' W		
" 24	" 42° 15' N	" 40° 21' W	" 8	" 42° 03' N	" 39° 59' W		
10 mo 13	" 42° 15' N	" 39° 50' W	" 10	" 41° 54' N	" 39° 53' W		
" 6	" 42° 15' N	" 39° 55' W	" 13	" 41° 44' N	" 39° 36' W		
" 4	" 42° 15' N	" 40° 00' W	" 14	" 41° 35' N	" 39° 50' W

" 23	" 42° 20' N	" 42° 00' W	Then put for New Bedford.				
" 24	" 42° 04' N	" 41° 20' W	1864 Roscius in June. The				
11 mo 1	" 42° 14' N	" 42° 16' W	took two sperm whales				
Then put for home.				lat 45° N long 30° W made			
				270 lbs			

To which I might add the "Lafayette" 1861, "Canton Packet" 1862, "Oppray" 1863 — all about the same as the foregoing and each seeing whales more frequently each month as the season advanced, say after the 8th month came in.

If instead of stopping all the latter part of the season on the parallel of 40° N. long 52° W. to 45° W. you should prefer to go and stop in lat. 42° 20' N. long 40° 45' W. I should not object — go to one or the other — and not run back and forth — except you find sufficient inducement elsewhere before you leave lat. 34° 40' N. long. 44° 03' W. As I have before said, stop wherever you find whales, at least ten days and as much longer as you may have reason to expect to find them again on the same spot.

Going at this season of the year, vegetables cannot be obtained that will keep long, and yet you cannot afford to ~~lose~~ lose any part of the season by leaving the ground for refreshments. I propose that you shall be at sea about six months — and then go into port and lay long enough to get thoroughly recruited. Therefore do all you can to protect yourselves with what you have, and obtain from passing vessels a few vegetables when you can.

Take good care of your men, ship & boats and cruise as I have directed until the Eleventh month (November) comes in and as much later as circumstances will warrant, bearing in mind that the whales are to be found there more or less all winter, and you will see by the abstracts that the "Roscius" in 1861 whaled in 39° to 41° N. as late as 12 mo. 3 — in 1862 as late as 11 mo. 26 — and in 1863 up to 11 mo. 1 — also when coming passenger in the "Acacia" last year, 1864, we saw a number of large Sperm whales 11 mo. 24 in lat. $41^{\circ} 35'$ N. long. $41^{\circ} 35'$ W. and should you, by careful management, hold on a few days and thereby get fifty or a hundred barrels you would be well compensated.

I however want you should feel quite at liberty at any time after the eleventh month comes in, to put away — and if circumstances require it, particularly if you have but little oil, you may run for

72
Hayat. But my plan is, that when you think you have stayed on the grounds as long as circumstances and prudence will warrant, that you make directly for Bermuda and with a chart on a large scale of those islands, which I will furnish, approach the islands carefully, obtain a pilot and make the harbor. Call upon the U. S. Consul for advice relative to the customs of the port and proceed at once to arrange for the shipment of your Oil, and if it appears necessary employ the police to have a regard for your men. I estimate you will have time enough to get in there, lay several weeks, and start from there well recruited, and with a good supply of vegetables say on or about New Years day for a cruise of about sixty days. And on leaving Bermuda at that season of the year, I would advise that you make directly Northward and strike the parallel of $40^{\circ}N$, as far West as $55^{\circ}W$ and that you keep in lat. 39° to $41^{\circ}N$ and in long. from $55^{\circ}W$ to $45^{\circ}W$ until say about the 1^{st} of 3^{rd} month (March 1^{st}) when you may be at liberty to run for Hayat or Bermuda. If for the latter, get there as soon as you can and lay two or three weeks, and then, say about 4 mo. 1^{st} leave and proceed to touch lat. $40^{\circ}N$ in long. $60^{\circ}W$, and for the balance of 4^{th} month and all of 5^{th} month limit yourselves to the parallel of $40^{\circ}N$ long. from $55^{\circ}W$ to $45^{\circ}W$.

Relative to the parallel of 40° N. in addition to the abstracts already stated, the "Tropic Bird" has seen Sperm Whales

Say 4 mo. 25. lat. 38° 14' ^N long. 57° 10' ^W
6 mo. 16. " 38° 54' " 47° 40'

The "Roscius" last year.

1864.
3 mo. 9. lat. 40° 30' ^N long. 56° 00' ^W.

4 mo. 24 " " ["] "Oliver Crocker" long. 61° 40' ^W
" " ["] "George"

6 mo. 28 " " ["] J. Delano. " 56° 50' ^W

5 mo. " " ["] "Roscius" " 58° 00' ^W

1864.
8 mo. 30. " " ["] "Roscius" " 51° 50' ^W

{ And Capt. Delano
in the 1st mo. 1865.
lat. 40° N. long. 45° W.
saw many whales.

"Roscius" previously.

7 mo. 20. lat. 38° 33' long. 48° 42' ^W
" 29. " 40° 00' " 46° 12' ^W
10 mo. 21 " 39° 56' " 49° 11' ^W
" 30 " 39° 30' " 44° 58' ^W

After the 6th month comes in, acting upon the foregoing, and your own observation in 1865 you may feel at liberty to cruise as you may think best, - but should you be in doubt where to locate - I should confidently believe that you could not do better than to limit yourselves for the whole season, excepting just time enough to run once to Flores or Fayal for vegetables, to lat. 43° to 46° N. long. 39° to 45° W. You might not see whales often there in the early part of the season - but as after, I think, as elsewhere provided you stayed all the time within those limits. And upon further consideration I feel like urging you to make that your ground for the whole season in 1866, that is, after the 6th month comes in. I have put on

board Provisions and Stores of good quality, sufficient I think for eighteen months, except Bread, Beef & Pork — of which you have a year's supply, and for the other six months I propose to meet you in the winter at Bermuda with Beef & Pork & Bread.

I intend you shall have enough of good sound Provisions, and if I should fail to supply them in sufficient quantity — then take care in time and when you can conveniently to make up all that you need, so that our disposition to provide sufficient food may not be called in question.

Under the forward deck are four casks drinking water and some Beef & Pork — under the after deck, four casks Malasses, one of Butter, one of Sugar, and some Beef & Pork. — The four cask nearest the keelson on both sides, from fore hatch to main hatch, are fresh water, and contain about 260 Bbls. — eight casks on fore hatch or about 35 Bbls — two casks in wing, starboard side, 16 Bbls. and the butts make up about 328 Bbls drinking water. As they are emptied, have them filled with salt water. Your Bread & Flour and other stores are in the after hold.

Should you fall in with Capt. Crape, in the "Roscius" let him have the benefit of any abstracts and views herein, that I have not already given him. Avoid ~~the~~ other whalers and see to it that you have

such a lookout always in the night, and thick weather, as will protect you from collisions with other vessels.

As a general rule, when whales are seen, two boats or even one is better than more, in the water, until the first whale is struck, and the Captain or Chief Mate should be in charge of the ship until the first boat fastens.

And when you ^{first} see the whales, and before you know how much to rely upon your Boatsteers, it will be ~~very~~ ^{first} important that the boat that goes first to the whales should be the most reliable. And should the Captain think it best to lower first himself, the Mates should cheerfully ~~resign~~ acquiesce, because if the first boat does its work well the result would doubtless be much more satisfactory than if the first opportunity was missed.

In looking over the matter again, I repeat my impression that you will not do better for the Summer of next year (1866) than to keep the "Tropic Bird" on the parallel 40° N. long. 60° W. to 45° W. until 6mo. 1st and then limit yourselves all the remainder of the season, from lat. 42° N. long. 39° W. to lat. 46° N. long. 40° W. — and when stopping in any one place, should you be without whales, bearing in mind that you might in any other place also be without whales. When the "Tropic Bird" took ~~about~~ 600 Bbls, she was from 6mo. 28 to 8mo. 18 say 51 days without seeing a whale.

The "Marion", the year previous, on her way out took about 500 Bbls, was from 7^{mo}. 15th to 8^{mo}. 15th say 31 days, without seeing whales. The "Rascals" in 1864, cruising on grounds where she had seen whales all the early part of the season frequently, ^{the year previous} did not see a whale after 3^{mo}. 9th until 6^{mo}. 22^d say 105 days, and yet Capt. Honeywell kept his ship on the ground, and afterwards took 360 Bbls in about two months, and then run away from whales to get home.

My object in dwelling so much upon this subject, is to set forth the importance of selecting some one locality and keeping to it.

But the great point is to get hold of the whales and stay where they are.

These instructions and the information contained in them are for no eyes but those of the Master of the Bark "Tropic Bird", and no part of them is to be copied, or in any way transferred or communicated to any person whatever.

The "Tropic Bird's" spars are too heavy for such a finely formed vessel; therefore, when the summer is drawing to a close, if you think you can spare the topgallant sails, it may be well at a convenient time to get down one or both of the top gallant masts and put them where they will be most out of the way.

My principal object in preferring Sennada to Nagai, is that Oil may be shipped from

Bermuda without delay, and instead of \$2.30 in Gold, which we pay from Hayal, the freight from Bermuda should be considerably less than One dollar in U. S. Currency, as the passage requires usually but a few days. We get oil brought from St. Helena, and the West Indies for one dollar. Immediately, on arrival at Bermuda, ascertain the cost of freight and arrange for the shipment of your oil to New York, and write immediately to me by the most direct conveyance, how much oil you will ship so that I may have it insured, and possibly I may be able to get a few lines back before you get away.

In closing, I wish to be understood that I do not intend to require anything impossible or even unreasonable, and should circumstances at any time render the requirements herein made impracticable, I shall consider the Master of the "Tropic Bird" at liberty to vary from these instructions so far as his judgment may dictate, will be for the interest of all concerned in the voyage.

And commending you to the care and guidance of that Power that rules the wind and the sea, and worketh in the hearts of men, I am

Thy friend.
